

WHAT IS RAINWATER HARVESTING?

Rainwater Harvesting is the collection and storage of rainwater that would otherwise flow down gutters into the drain. Rainwater is collected from the roof and re-used within the home and garden. This can help to keep your garden thriving throughout summer, as well as making your home more sustainable.

BENEFITS

Auckland has been experiencing severe water shortages in 2020 with current water storage levels sitting well below the average for this time of year. The region has in fact experienced drought in three of the past four years, and six in the past ten, so it is clearly an ongoing issue.

There are current outdoor water restrictions in place with the potential for more severe restrictions to follow with a long, dry summer forecast ahead.

Installing a rainwater harvesting system on your property will enable you to;

- Contribute to Auckland's water security goals by reducing personal use of the regions water supply.
- Minimize personal disruption caused by existing and potential future water restrictions.
- Utilize current Local Government incentives and improve your water self-sufficiency.

DID YOU KNOW?

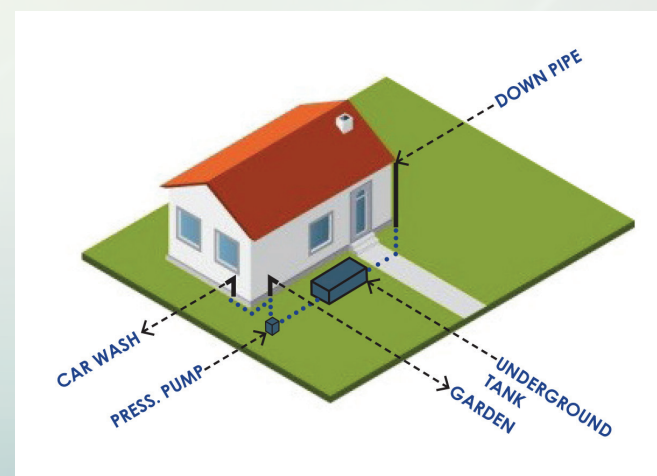

- Water harvested from these systems can be used for a variety of non-potable uses including toilet flushing, washing machines and outdoor use (such as garden-watering and car-washing).
- Your garden actually prefers rainwater to mains water because it does not contain the chemicals needed to make mains water drinking quality! Plus, when using detergents, you will need to use much less because there are no chemicals and the water is softer.

OUR SERVICE

Thomas Consultants offer an end to end service that will ensure a hassle-free process for the design, consent and installation of your rainwater harvesting system. We can provide bespoke design solutions for a variety of systems including above ground or in-ground systems with a pump and capacity suited to your needs and property.

Our systems are:

- Designed for your house and your requirements
- Fully consented
- Installed hassle free by our installation partners.

Prices start from **\$5,400 ex GST**
- For more information or to schedule your free initial consultation please contact us on info@tcec.co.nz or (09) 836 1804
